

## Equipment for sale

JEOL JEM 2000FX transmission electron microscope. Decommissioned by WJA Electron.

Images of actual tool.

Electron Optics & Signal Detection:

- LAb6 and tungsten filaments
- 200kV max acceleratng voltage
- 2.5 Angstrom resolution
- Gatan Orius camera
- High resolution objective lens

Pumping System & Vacuum:

- Column ion pump, Oil Diffusion & rotary roughing pump
- Chamber Pressure < 5e-6 mBarr

Specimen Stage/Holder

- 1 double tilt
- 1 single tilt

**Please contact WJA electron for pricing and options. Possible to split TEM and Gatan camera.**
